Leitsysteme, Steuerungen und Messtechnik von Rittmeyer sind die Basis für innovative Lösungen in Energie- und Wasserversorgungen, Wasserkraftwerken und Entsorgungsanlagen weltweit. Rittmeyer ist als Engineerings- und Dienstleistungsunternehmen mit höchstem Qualitätsanspruch auf Software- und Systemintegration für schlüsselfertige Anlagen im Infrastrukturbereich spezialisiert.

As a System Engineer – Network Specialist, you will work in an interdisciplinary team of professionals at the interface of ICT and the water and energy industries. You will be responsible for the development, design, and implementation of network and server solutions specifically tailored to the needs and requirements of the water and energy industries.

ICT System-Administrator

Zagreb, CRO   80-100%

Dein Aufgabengebiet
Main Tasks:

- Designing, realizing, and integrating highly specialized network and server solutions
- Analyzing, troubleshooting, and optimizing existing network and server infrastructures, taking into account the specific requirements of the water and energy industries
- Providing technical consulting and training to project execution teams in network technologies
- Ensuring network security and implementing the latest security technologies
- Providing 2nd level support and technical expertise for network issues

Secondary Tasks:
- Occasional field assignments in the DACH region
- Maintenance and troubleshooting of networks and process control systems
- Assisting in the creation and rollout of standards

Was du mitbringst
- Basic education in computer science or an equivalent technical education
- Advanced training in system engineering or network technology
- Several years of professional experience in system engineering and networking, including further training
- Teamwork, solution-oriented thinking, and service orientation
- Excellent knowledge of Microsoft platforms, virtualization, and IT security solutions
- In-depth knowledge of Active Directory is an advantage
- Language Skills: Excellent English skills in both spoken and written form / German skills are an advantage.
- Willingness to Travel: up to 10% (national and international)

Was wir dir bieten
- We offer you a demanding and varied role in a dynamic and innovative environment. You have the opportunity to actively participate in the development and design of solutions for the market leader in the water and energy sector and to contribute your expertise to exciting projects.

  - Working with modern technologies and continuous engineering training
  - Permanent employment
  - Christmas bonus, Easter bonus office
  - Supplementary and additional health insurance + annual physical examination
  - Baby birth bonus – 1000 EUR
